

## Eastwind for SaaS - Datasheet

### The Challenge:

Enterprises today fight a complicated battle: there is a global army of hackers who never sleep and who are looking for new and creative ways to break into networks, whether hosted or on-premise. Eastwind arms security teams with comprehensive visibility.

### The Solution:

### The Benefits:

- Complete cyber security and visibility of your SaaS solutions.
- Enhance your Breach Analytics with Eastwind for SaaS telemetry.
- Streamline your procurement; No POs required; Be up and running in minutes.

### Advanced Breach Analytics for SaaS

Eastwind for SaaS provides visibility, threat analysis and user and entity behavioral analytics to identify malicious activity, insider threats and data leakage within your G Suite, Office 365, Dropbox, Box and Salesforce services. Eastwind for SaaS enables organizations to digitally transform, while putting security first.

At its core, Eastwind is powered by the Breach Analytics Cloud. This powerful solution enables cyber defenders to hunt, analyze and visualize all activity relevant to your enterprise. Eastwind provides a comprehensive array of sensors and applications that gather, enrich and analyze telemetry from all areas of your cyber terrain, including SaaS, IaaS, DNS, hybrid networks and all users on and off premises. The result is breach analytics at speed and scale accelerating incident response and forensics.

### Eastwind for SaaS Solution Architecture

### Eastwind for SaaS

Eastwind provides unified visibility of the entire cyber terrain. With this solution, security teams can reduce overall impact from breaches, including costly fixes, disrupted business, stolen information, and damaged reputations. Eastwind for SaaS is currently available for Office365, GSuite, Salesforce, Dropbox and Box.

### Eastwind for Capabilities

The Eastwind for SaaS products, collect, analyse, and enrich telemetry data from hosted applications into your network analytics platform. Features include:

- Authentication - failed/successful/brute force/directory harvest
- Anomalous user behavior - geo/irregular hours
- Open file permissions - data loss protection
- File CRUD operations - create/read/update/delete

## Breach Analytics at Speed and Scale

Analyze telemetry from Office 365, G Suite, Salesforce.com, cloud storage providers, cloud infrastructure, traditional networks and virtual environments all from within a single pane of glass.

Eastwind offers the only breach analytics cloud that provides complete visibility of your key cyber terrain. We help analyze the flight data flowing across your corporate networks, virtual networks, cloud provider networks, cloud application networks, and your mobile workforce—with speed and precision. Always watching, our automated hunters enable you to identify malicious activity that evades all other security solutions.

Our breach analytics technology searches, automatically and on-demand, through months of information to accelerate incident response and forensics. Serving as the system of record, Eastwind Networks provides the critical context you need to make intelligent decisions quickly.

## Power of the Portal

The Eastwind Portal displays areas of interest quickly and easily using the breadth and depth of metadata using our customizable dashboards. It not only provides security event information but cyber situational awareness and context of your cyber key terrain. Eastwind provides the necessary context for security teams to respond and recover with bolstered threat intelligence and multiple detection techniques built upon complete visibility of your hybrid network. With the Eastwind Portal you can pivot rapidly, find complex relationships, and visualize patterns using the Breach Analytics Cloud.

## Eastwind for SaaS costs

*Eastwind for SaaS - Per unique user per month  
—Metered or Contract offerings.*

## Remove friction from SaaS security

*Pay for visibility and cyber security of your SaaS deployment directly through your Amazon account. Streamline your procurement; no POs required.*
